

Name _____ Class _____ Date _____

Alcohol use disorder (AUD) is a medical condition that doctors diagnose when someone's drinking causes them distress or harm. AUD ranges from mild to severe.

How does alcohol affect teens?

When teens drink, alcohol **affects their brains** in the short-term—but repeated drinking can also impact it down the road, especially as their brains grow and develop.

Short-Term Consequences of Intoxication:

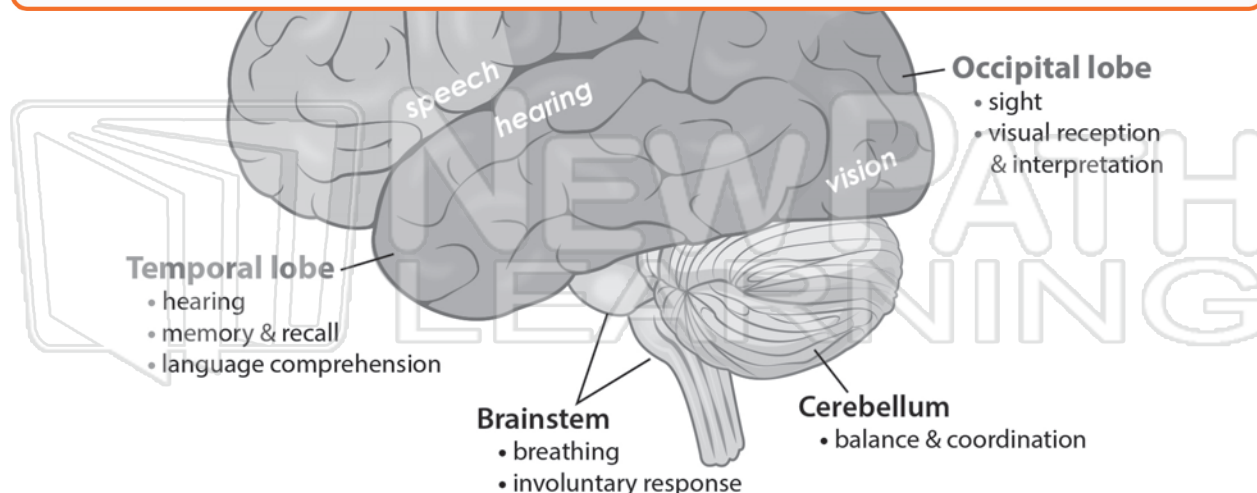

- a harder time making good decisions
- less aware that his/her behavior may be inappropriate
- more likely to engage in risky behavior
- less likely to recognize potential danger

What is a Standard Drink?
